

ACTION PHOTOS

PhotoCrazy has provided event photography since 1999 and covered thousands of events. **PhotoCrazy does NOT charge any fees for taking event photos.**

We maintain all the photos on our www.photocrazy.com website back to 1999.

We offer an unconditional money back guarantee on all of our services.

We utilize professional photography equipment and developed various methods and [equipment](#) that allows our photography to be the best in the industry.

We are continually developing new techniques to catch riders at memorable moments.

For Example:

1. We synchronize all photos to the rider's RFID Helmet Label. This allows quick search and picture retrieval by simply entering the RFID Number into our website. No bib screening or endless searching is necessary.
2. We anticipate taking high quality photos at each unattended RFID Reader location. The camera(s) would be triggered when a valid RFID Helmet Label is detected. This would allow every rider to see multiple photos of themselves for any event and provide "photo finish" shots when necessary.
3. Our synchronized Action Photos to RFID Tracking allows us to publicly identify [King or Queen of the mountain](#) and other [fastest finishers](#).
