

Registration Packets

Cut costs and stream line your event registration packets with RFID Helmet Labels.

1. The **RFID Instruction card** is combined with a **Mail Merge card**
2. The two cards are attached to each other and sorted by last name
3. Riders would pick up their cards by last name alpha ranges
A-D, E-L, M-O, etc.
4. The rider would go to the "Jersey" table to pick up their jersey, etc.
5. The top sheet indicates which items the rider paid for
6. The top sheet would be used as a "Passport" throughout the event.
7. There is ample room to check off items on the top sheet
8. Items like "Waiver Signed", "Wristband Given", etc. can be added.
9. This process eliminates the need of expensive bib numbers.
